## PRODUCT INFO

---

### OVERVIEW

Laid back and relaxed, the Thunderbird is exactly the way a cruiser should be.

But, on top of that, Triumph engineering has added superior performance and handling without ever diluting what the Thunderbird is all about.

The engine itself is unique in its class, a classic Triumph parallel twin. And the styling is pure cruiser with sweeping lines, low seat and high bars.

But like any Triumph it's highly practical too, and perfectly feasible as an everyday commuter. A long, low, fat-tyred, chromed up, everyday commuter.

---

### ENGINE

#### Power

The Thunderbird's 1597cc parallel twin engine kicks out a muscular 86PS and a thumping 146Nm of torque at just 2750rpm.

#### Liquid Cooled

It looks like air-cooling with its neat looking fins, but such a big, powerful engine is more efficient when cooled by liquid. That's why our designers have discreetly placed a radiator between the frame's front downtubes.

#### Configuration

Full of modern engineering, we added double overhead camshafts and a crankshaft with 270 degree firing intervals, to give you an engine with authentic cruiser character. Whilst the fuelling is looked after by a sequential fuel injection system and progressive throttle linkage which ensures the engine delivers its torque exactly the way you expect.

#### 6 Speed Gear Box

The transmission uses a six-speed gearbox with a tall top ratio for relaxed highway cruising and exceptional fuel efficiency.

#### Belt Drive

We've incorporated high tech materials in the belt and pulleys so you get a drive with an exceptionally long life even compared with other modern bikes. And almost zero maintenance requirements.

It's also smooth, quiet and helps keep the rear of the bike clean.

ENGINE	
TYPE	Liquid-cooled, DOHC, Parallel-twin, 270° firing interval
CAPACITY	1597cc
BORE	103.8mm
STROKE	94.3mm
SYSTEM	Multipoint sequential electronic fuel injection, progressive linkage on throttle
EXHAUST	Chromed twin-skin stainless steel 2 into 1 into 2, tandem large-volume catalysts in centralized catbox, chrome-plated exhaust
FINAL DRIVE	Toothed Belt
CLUTCH	Wet, multi-plate
GEARBOX	6-speed, helical type 2nd - 6th
OIL CAPACITY	1.1US Gallon

## CHASSIS

### Frame

We gave the Thunderbird a twin spine steel frame that's exceptionally stiff. Coupled with well-dampened suspension this gives you a plush ride and exceptionally stable, easy handling for a bike in this class.

### Suspension

With their 47mm diameter and 120mm of travel, the forks are carefully matched by our suspension specialists to the pair of chromed rear shocks. And, their 5-position adjustable spring preload allows you to adjust them to suit the way you want to ride.

### Brakes

We made sure that the brakes are well up to the Thunderbird's wide range of capabilities. A pair of four-piston callipers up front provide sufficient power to cope with a fully loaded bike, high speeds and mountainous terrain. You'll find they offer loads of feedback too.

### Wheels and Tyres

The Thunderbird gets handsome, five spoke cast alloy wheels, fitted with Metzeler tyres.

### Handling

We built the Thunderbird to give cruiser riders a bike that handles as well as it looks.

That's why it steers so well, especially at low speeds despite the forks being raked out at a cool-looking 32 degrees.

The Thunderbird is surprisingly agile too with enough ground clearance for decent lean angles and an engaging ride when the road gets interesting.

### Seat Height

The seat is very low at just 700mm and the cruising position is relaxed and spacious, with the footrests positioned forward to keep you comfortable without being too much of a stretch.

The low seat also means that it's easy to plant both feet firmly on the ground. So no matter what your height is, you can confidently manoeuvre even at low speeds.

### Riding Position

As you'd expect, the bars are pulled back and wide, so the grips are exactly where you want them. Giving you a relaxed stance and the high levels of control you want on a bike of this size.

CHASSIS	
FRAME	Tubular Steel, twin spine
SWINGARM	Twin-sided, steel
FRONT WHEELS	Cast aluminum alloy 5-spoke 19 x 3.5 in
REAR WHEELS	Cast aluminum alloy 5-spoke 17 x 6 in
